TurnKey Internet Adds TurnKey Vault Network Attached Storage—New Cloud-Based Storage Service

FOR IMMEDIATE RELEASE

Albany, NY, August, 25, 2010—Web hosting and business solution provider TurnKey Internet today announced the launch of TurnKey Vault Network-Attached-Storage (NAS) an enterprise-class cloud-based backup and storage solution for business clients. TurnKey NAS is ideal for file-sharing and online backups of servers or office PC networks, and can be mounted as a local hard drive for easy, secure drag-and-drop file copying.

TurnKey Vault NAS can be accessed from anywhere with support for FTP, SCP, SFTP, Rsync, NFS or Samba connections. PC, Mac, Linux and other operating systems are supported. TurnKey NAS is compatible with every backup software package that supports direct-to-disk backups, including: Retrospect, BrightStor, CommVault, NetVault, Netbackup, Tivoli, Shadow Copy, Microsoft Data Protection Manager and more.

"As universally accessible (and sharable) data becomes ever more important to consumers and businesses, cloud-based storage solutions have become indispensible tools," said Adam Wills, President and CEO of TurnKey Internet. "Historically, these solutions have been inaccessible to the average business client. We are very excited to be able to offer the seamless TurnKey Vault NAS as a universally compatible and extremely easy-to-use cloud-storage option to our clients."

TurnKey Vault NAS is part of TurnKey Internet's new breed of TurnKey business solutions, arriving on the heels of TurnKey Newsletter, their new web-based email marketing software.
